AIRPORT ADDS ENHANCED FLIGHT TRACKING FEATURE TO WEBSITE
www.iflycasper.com

CASPER, WY – Casper / Natrona County International Airport announced the addition of an enhanced flight tracking feature on its website, www.iflycasper.com. “The feature is basically a Flight Identification Display (FID) system that passengers are probably more familiar with in the terminals at larger airports,” said Glenn Januska, Airport Manager. “This system provides real-time flight information for arriving and departing commercial aircraft operations.”

Flight information on the website includes the airline name, flight number, where the flight is coming from or going to, the scheduled time of arrival/departure, and the current flight status: scheduled, landed, in air, delayed, or cancelled. Additionally, viewers can click on the status link for an aircraft in air, and they will see where the aircraft is en route, the departure and arrival airports, the scheduled and actual arrival/departure times, the aircraft type, as well as the current ground speed and altitude. “The system is really helpful when people are wondering what the status of a flight is,” said Januska. “If you’re headed out to the Airport to pick someone up on a flight, and you live 30 minutes away, you can track the flight on your computer and leave when the flight is 30 minutes out.”

SERVING CENTRAL WYOMING

Welcome to the Casper/Natrona County International Airport (C/NCIA), the Gateway to Wyoming! Located in the geographical center of the state, C/NCIA serves the air transportation needs of passengers from around Wyoming.
