AIRPORT UNVEILS NEW MOBILE WEBSITE

CASPER, WY – Casper / Natrona County International Airport unveiled a new website designed to provide Airport and airline information for travelers with mobile devices. “About 95% of the calls we receive

at the Airport are not for us, they are in regard to the airlines, car rentals, parking, and TSA,” said Glenn Januska, Airport Manager. “Because the Airport is open 24 hours per day, 365 days per year, but the administration office is not, we continually look at ways to use technology to get information to travelers or users of the Airport in the way they want it, when they want it, and increasingly important, where they want it.”

The mobile website includes most of the information found on the Airport’s primary website, www.iflycasper.com, but is formatted in a way which is easy to view and navigate on a mobile device. When users go to the www.iflycasper.com website on their mobile device, they are automatically redirected to the mobile website. “One of the most popular features of our website is the ability for people to track flights,” said Januska. “The mobile website allows the same thing, so travelers can see if a flight is delayed, what time a flight departed, when it is scheduled to arrive, and visually where the aircraft is enroute.”
