**AIRPORT UNVEILS TERMINAL FLIGHT INFORMATION DISPLAY SYSTEM**

CASPER, WY – Casper / Natrona County International Airport has unveiled a new Flight Information Display System located inside the terminal building. Monitors in the terminal lobby show two rotating screens, one that displays the status of departures and arrivals, and the second that graphically displays the location of commercial aircraft as they travel to and from Casper. “In 2009 we added a similar feature to the Airport’s website, [www.iflycasper.com](http://www.iflycasper.com) so that people could track flights from their computer, and in 2011 we added a mobile website feature for smartphones that did the same thing,” said Glenn Januska, Airport Manager. “However, we didn’t have anything inside the terminal for those waiting for an arriving flight or waiting to depart. This new system provides just that.”
