CASPER/NATRONA COUNTY INTERNATIONAL AIRPORT ON FACEBOOK

CASPER, WY – Facebook is a social networking website where users can add friends, send messages, and update their personal profiles to notify friends about themselves. Similar to user profiles businesses can create fan pages where Facebook users can become a fan. It is estimated 175 million users log in to Facebook daily. Fans of the Airport's Facebook page can learn about upcoming Airport events, see a wide variety of Airport and aircraft photos, airfare specials, news and contests. "Passengers do not always get to interact with Airport Administration and Facebook will open the door for them to do so," says Projects & Programs Manager Leah Henderson. To become a fan of the Airport go to our website www.iflycasper.com and click become a fan.
